

NURDANSKI
GALLERY

NURDANSKI GALLERY IS A PICK FOR THOSE

who want to discover the world with contemporary art.

We aim to enlighten new senses, names and new vision. Gallery promotes Ukrainian artists worldwide and cooperates with international artists.

Nurdanski gallery serves as a personal publishing house for talented artists and helps them with catalogues, artist's books, scholarly exhibition catalogues, as well as support with PR, art-logistics and juridical support worldwide.

SMITH & WINKEN

Bureau Smith & Winken was founded in 2020 by Ukrainian artist Valeriy Kuznetsov (b. 1968) and Austrian inventor Otto Winken (b. 1973). Valeriy Kuznetsov is a Ukrainian artist who works in the varied fields of architecture and design. He was awarded Red Dot International Award in 2015 and 2020, Grand Prix of the Year in 2009 and 2017, Maison & Objet in 2020, Dutch Designer Week in 2017, 2018 and 2020, Wow Ukraine in 2020, Paris Design Week in 2017, Red Dot Museum in 2004.

He has a world known architecture and design bureau Decorkuznetsov. His artworks are in a private collections worldwide.

Smith & Winken starts up from the stunning and unique series of works to Endless Movement.

ENDLESS MOVEMENT:

Artists live and work in Dnipro city (Ukraine) that is famous worldwide as a capital of space technologies and researches in the field of rocket science in the former USSR (Space program of the USSR, the first space apparatus, which brought a man to the near-earth orbit).

Artists were inspired by The Emirates Mars Mission «Hope Probe». Artists' imagination has captured by the spirit of Mars exploring and on that Spirit vibration creates real theater-researching of life as an infinity of movement on our planet and in space (play of light, shadow, movement, music).

Hover

HOVER BLUE

W: 240/920mm H: 940mm D: 95mm

materials: metal (color: dark graphite) blue plisse
3 patrons (color: black) 3 lamps

Edition: 1/10 each one is unique

Hover

HOVER GREEN

W: 240/920mm H: 940mm D: 95mm

materials: metal (color: green) green plisse
1 patron (color: chrome) 1 lamp

Edition: 1/10 each one is unique

Hover

The design is based on the rocker mechanism, which allows moving parts of the object to move forward and back at different speeds.

Shape pulsation effect is achieved by using paper pleats, which are invisible when folded, and, when open, look like a colored wedge, reminiscent, in combination with deliberately exposed mechanical parts, images of winged insects and complex mechanisms.

Since movement of object parts is cyclic, the viewer, at his own will, is able to stop and adjust it independently in any phase.

Dodo

DODO BEIGE

W: 600mm H: 1050mm D: 270mm

materials: metal (color: beige) black tree
2 patrons (color: black) 2 lamps

Edition: 1/10 each one is unique

Dodo

DODO BLACK

W: 600mm H: 1050mm D: 270mm

materials: metal (color: black) black tree
2 patrons (color: chrome) 2 lamps

Edition: 1/10 each one is unique

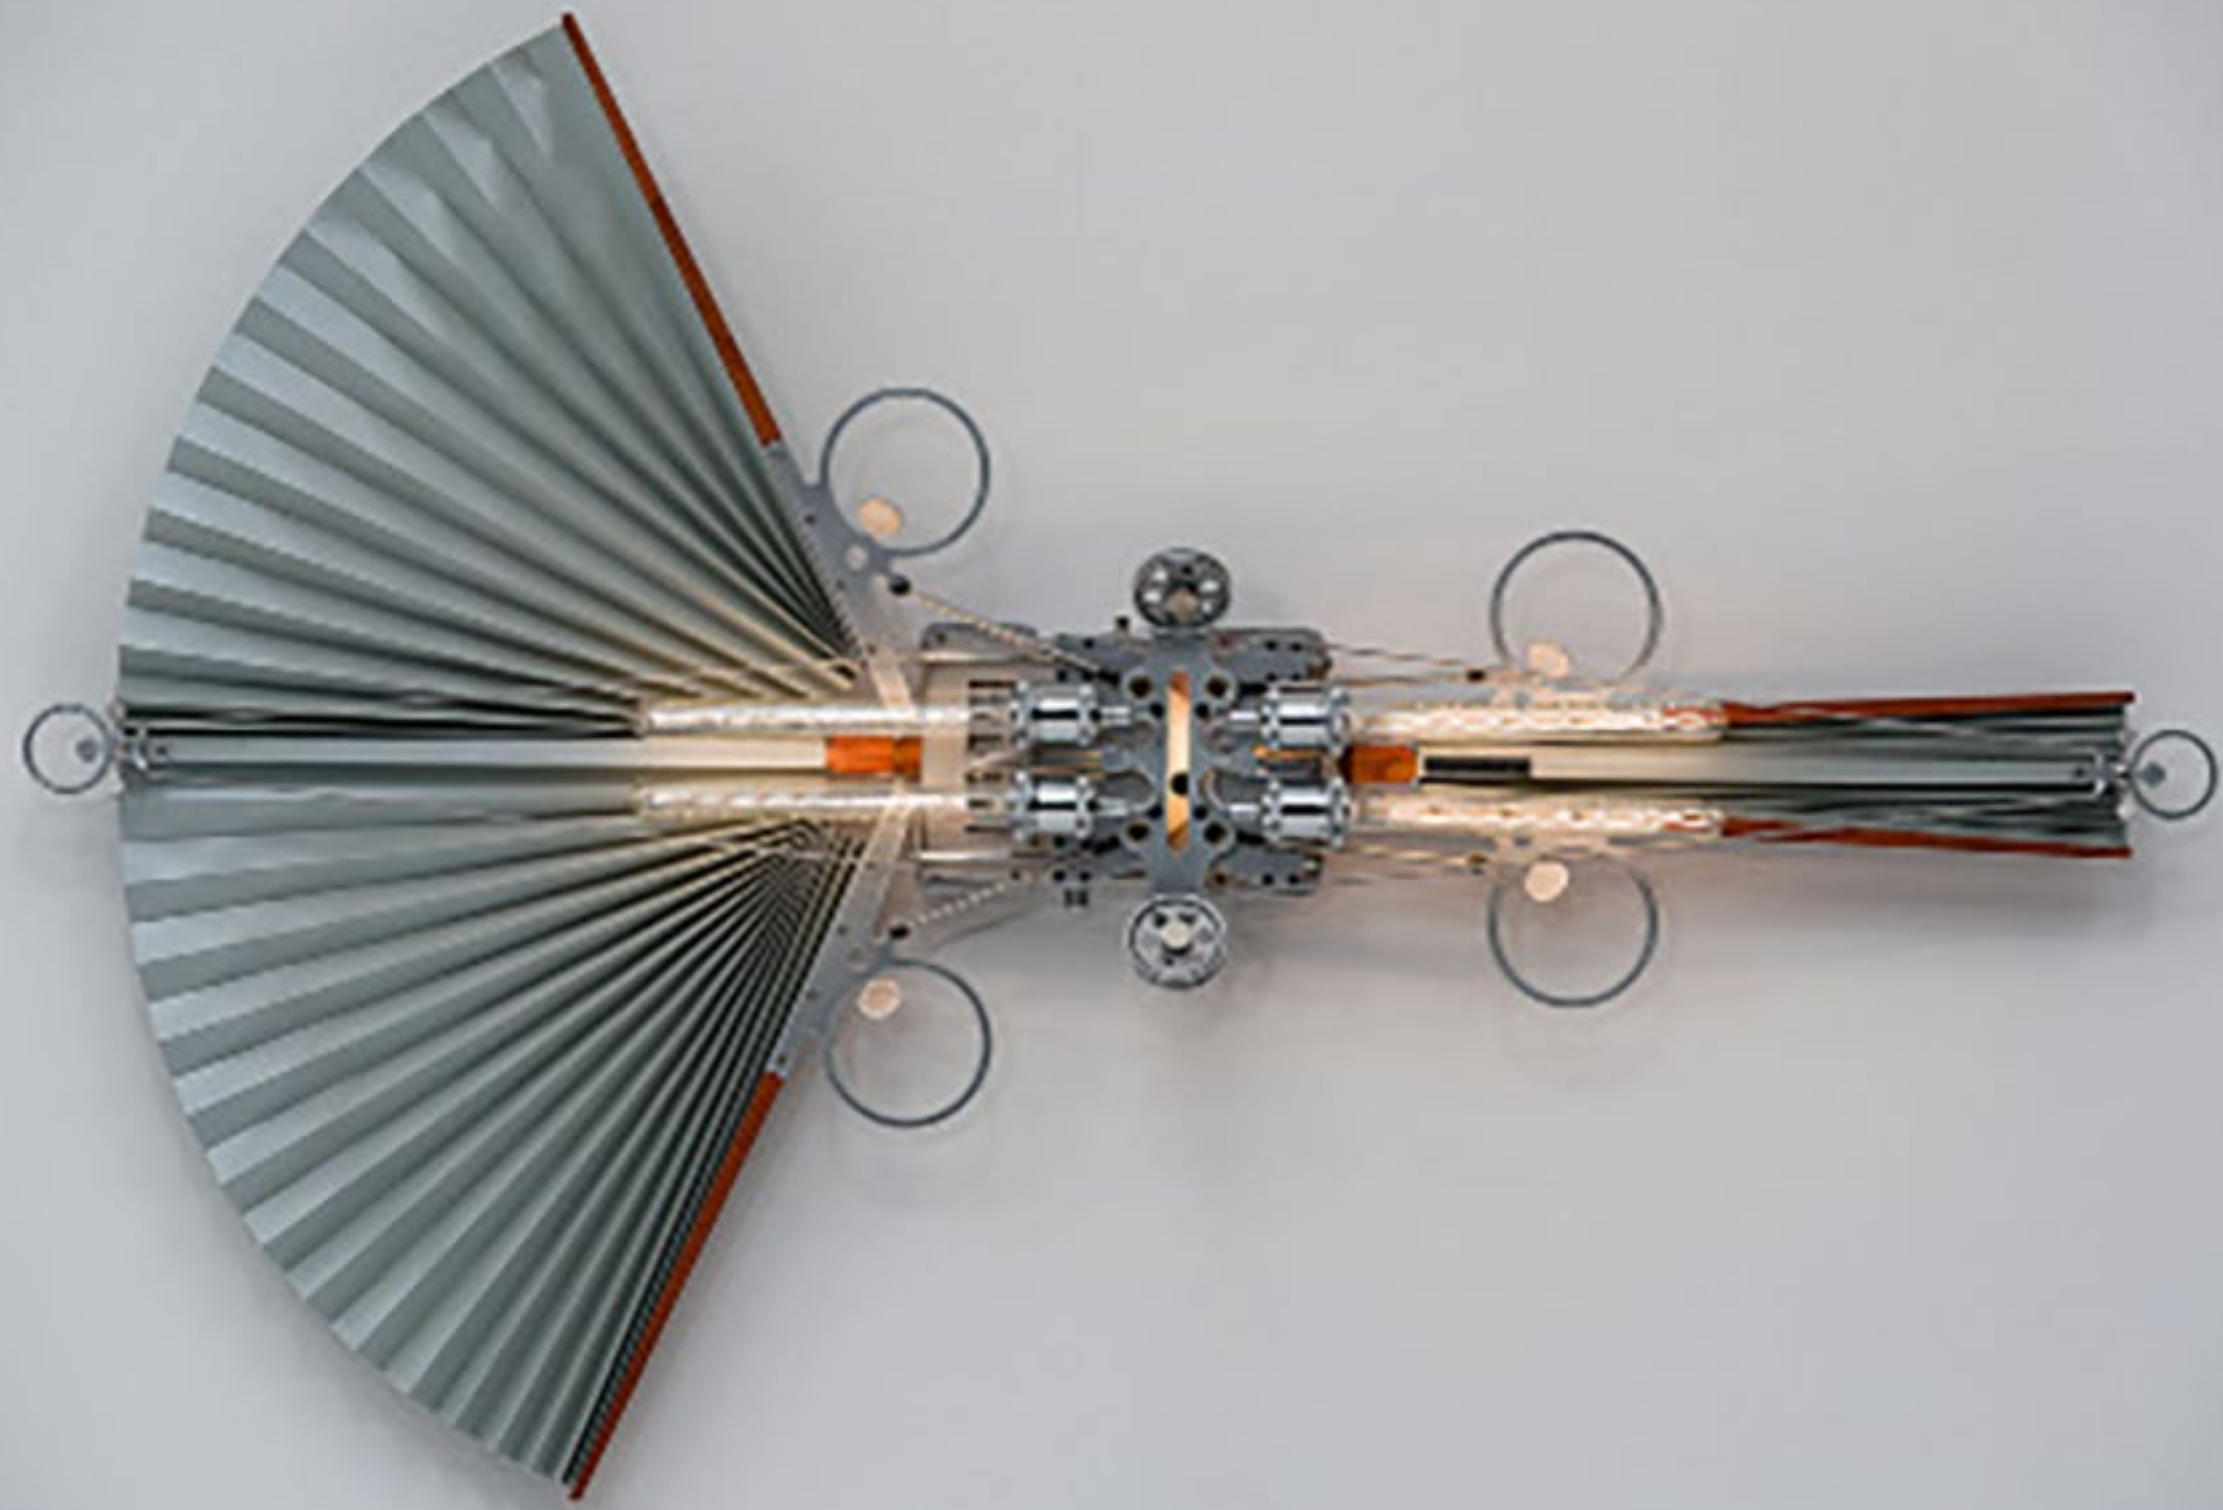

Docho

The visual effect is based on a pendulum. The sculpture is decoratively framed with thin glass tubes with backlighting. The core of composition is a truncated cone, from which all elements of the construction diverge crosswise.

GALLERY

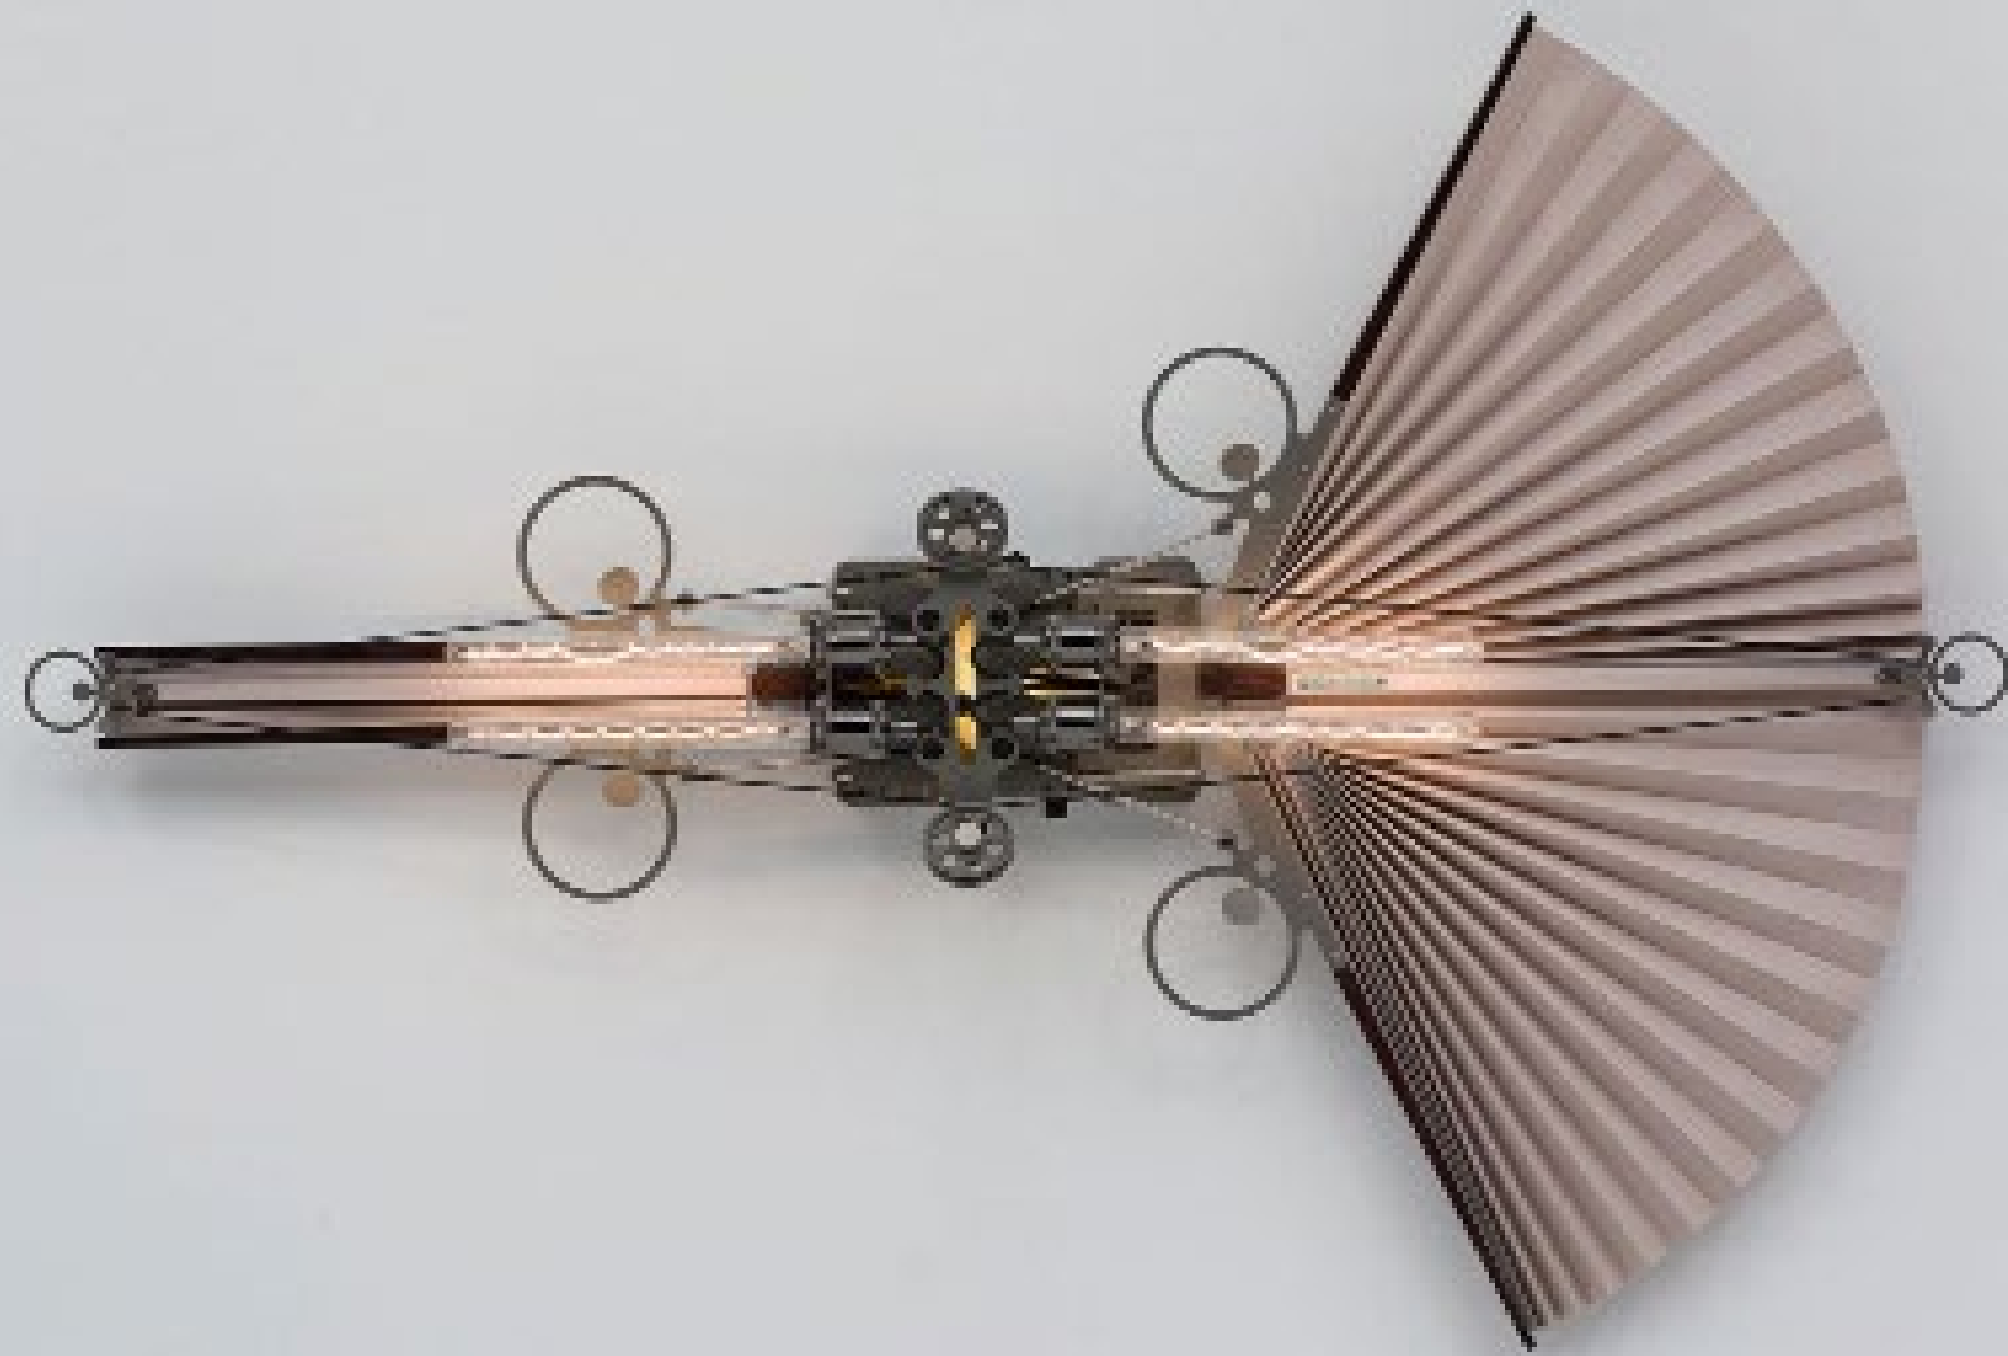

Skipper

SKIPPER CHROME

W: 1540mm H: 1030mm D: 185mm

materials: metal (color: chrome) cherry tree
4 patrons (color: chrome) 4 lamps

Edition: 1/10 each one is unique

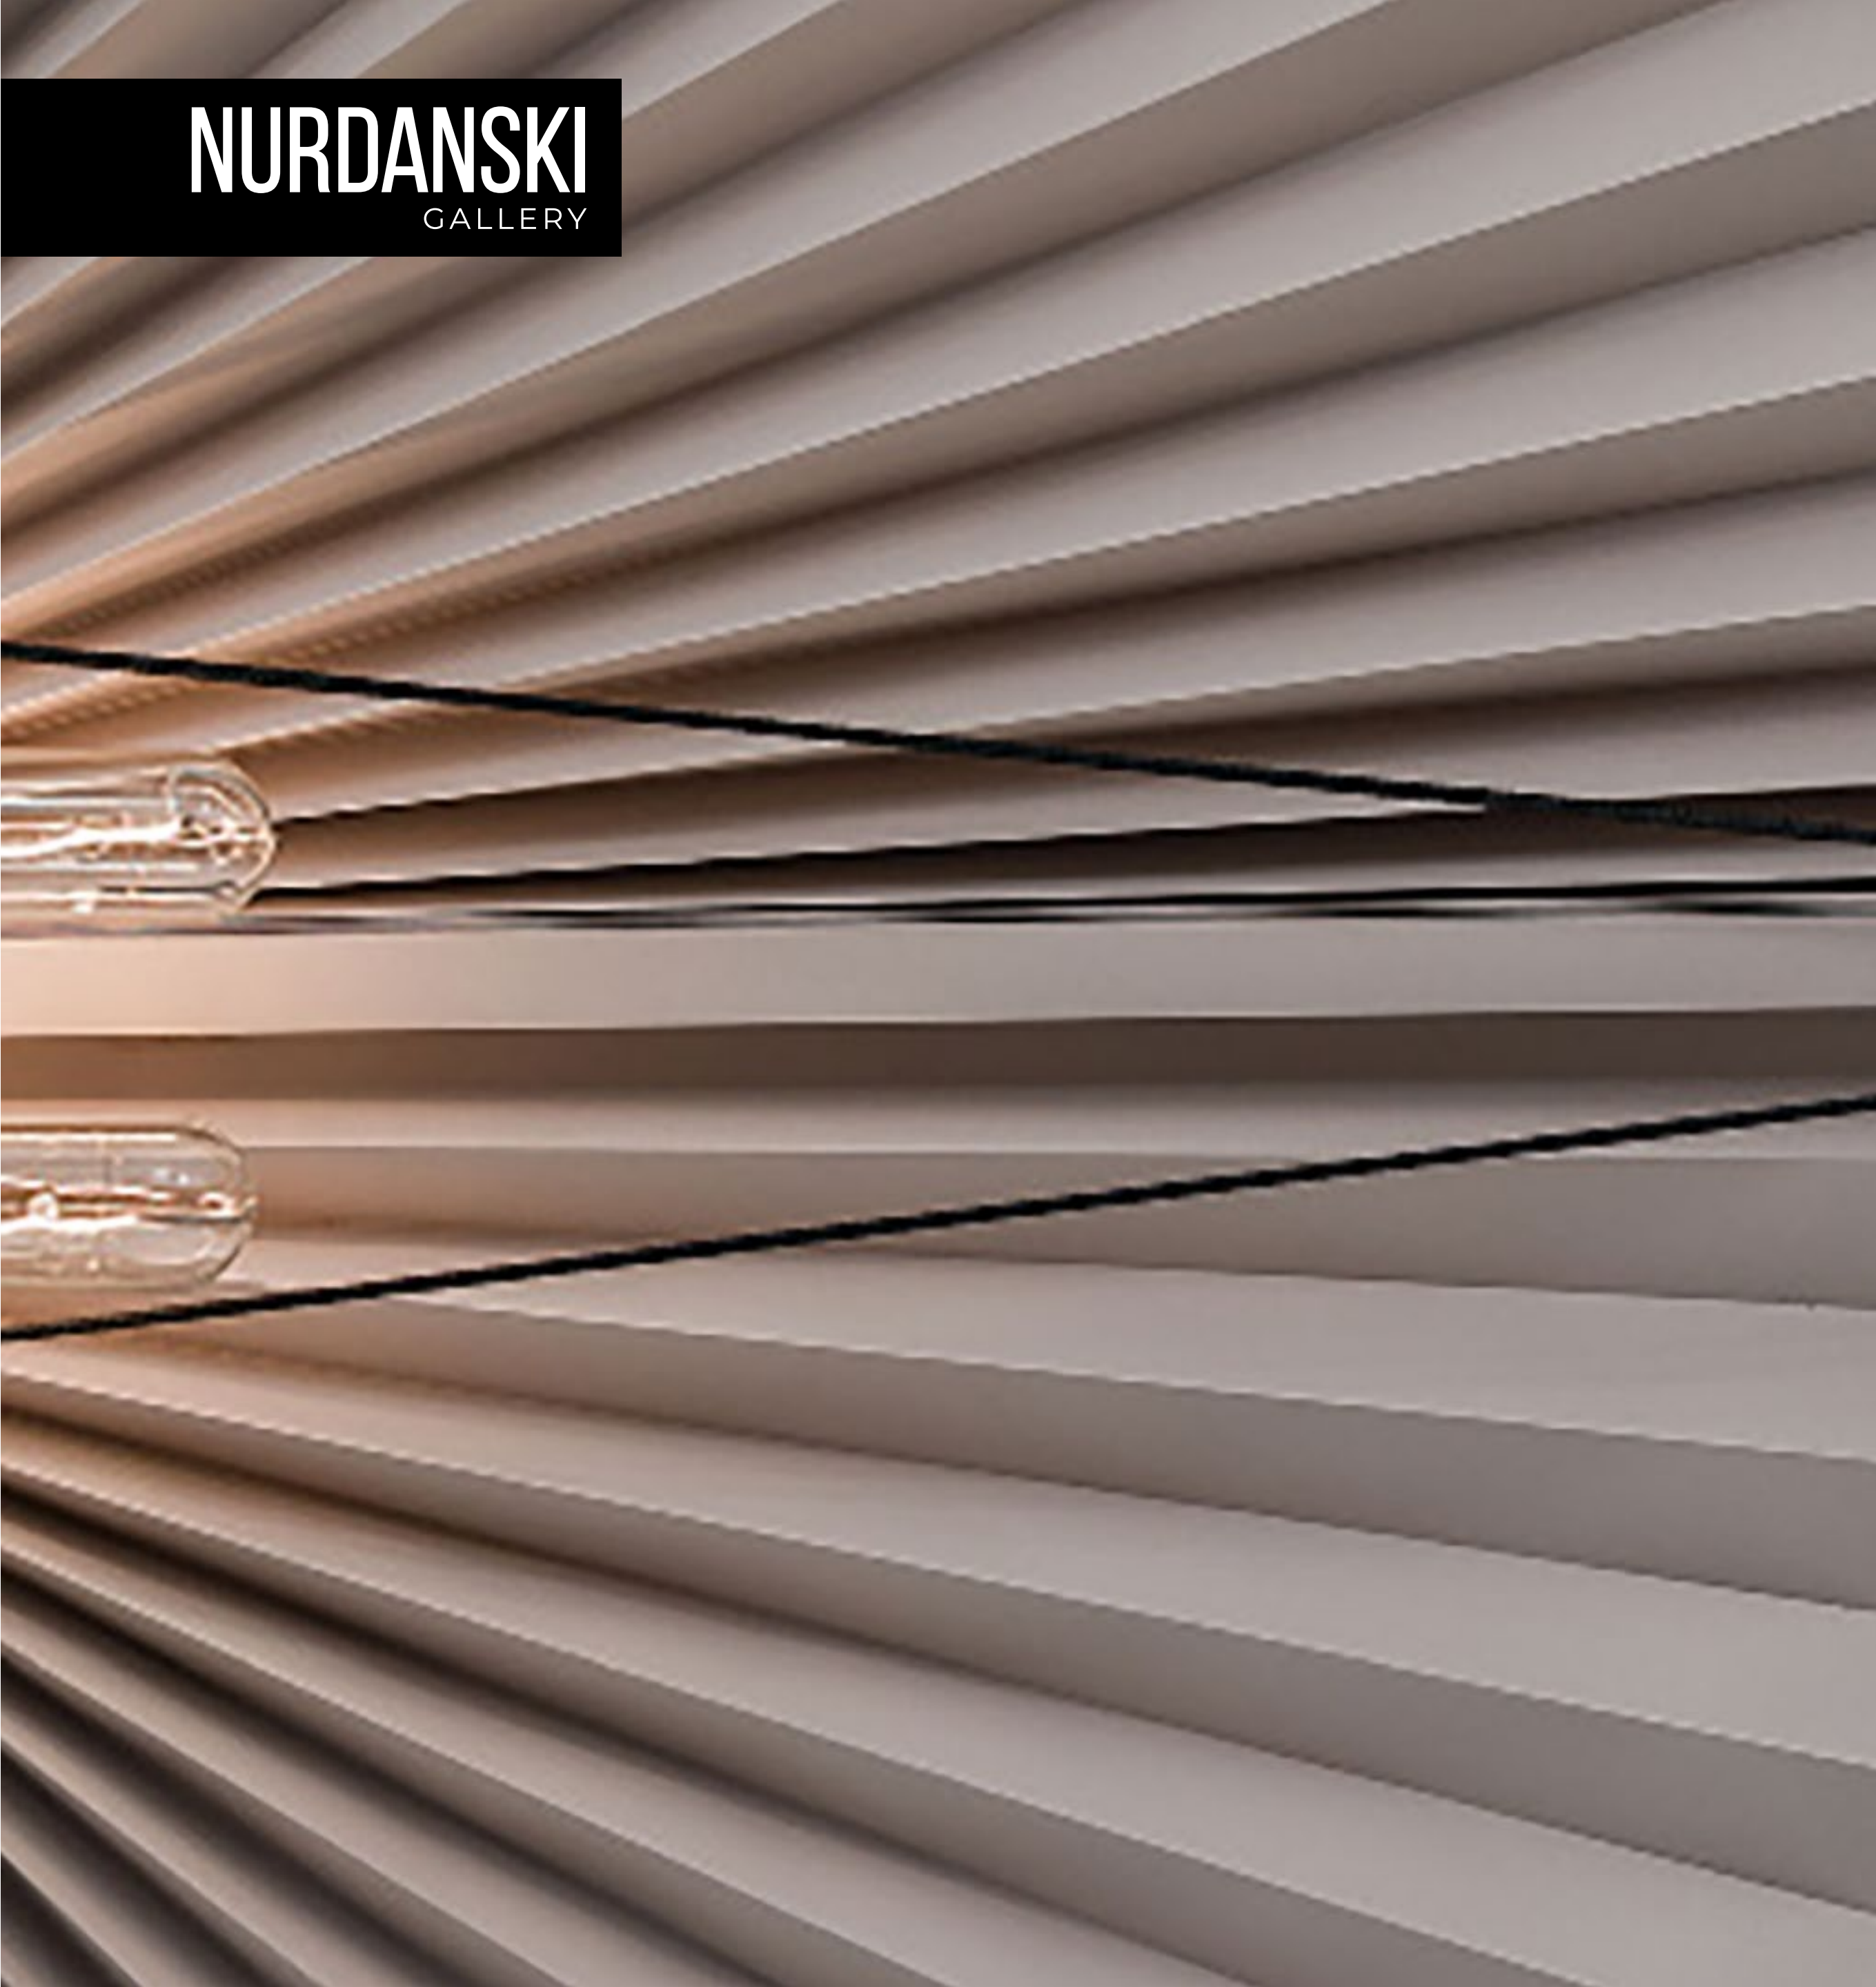

Skipper

SKIPPER GRAPHITE

W: 1540mm H: 1030mm D: 185mm

Materials: metal (color: dark graphite) wenge tree
4 patrons (color: black) 4 lamps

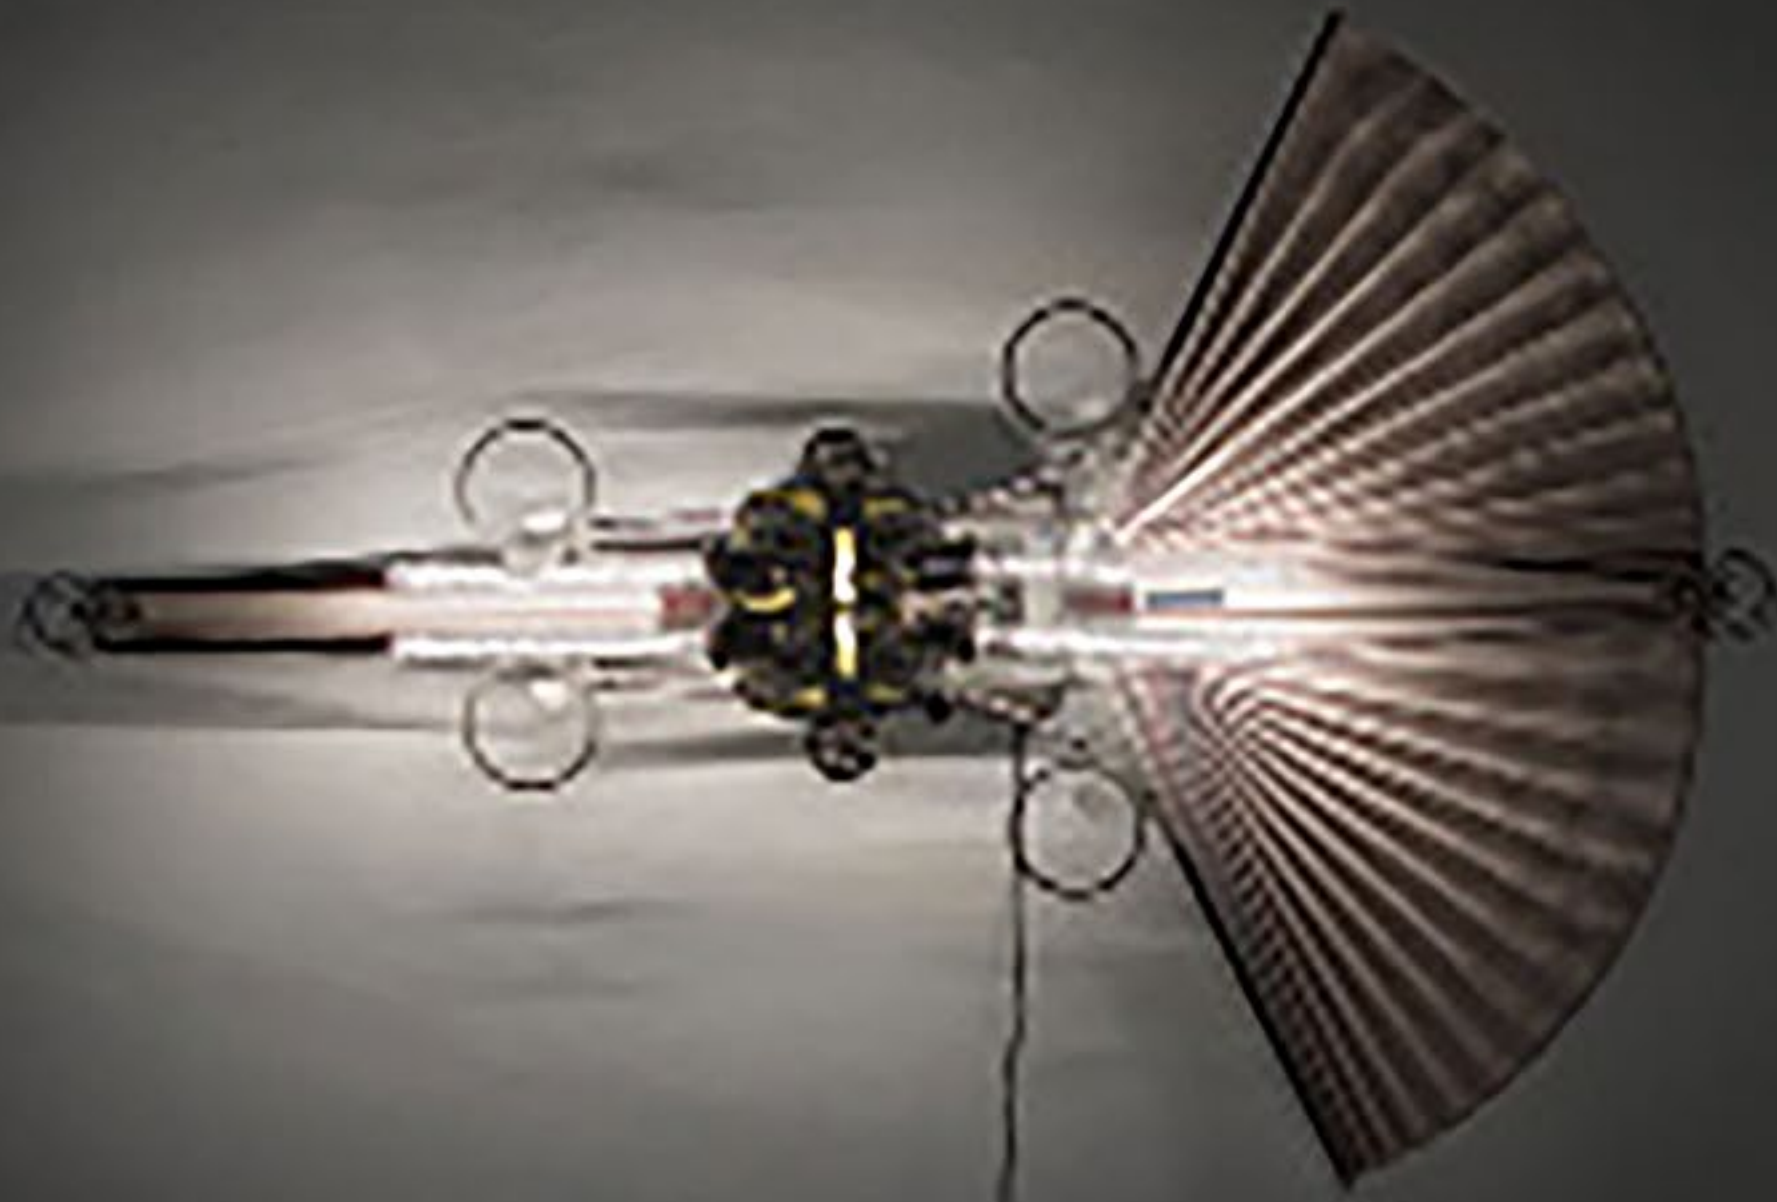

Edition: 1/10 each one is unique

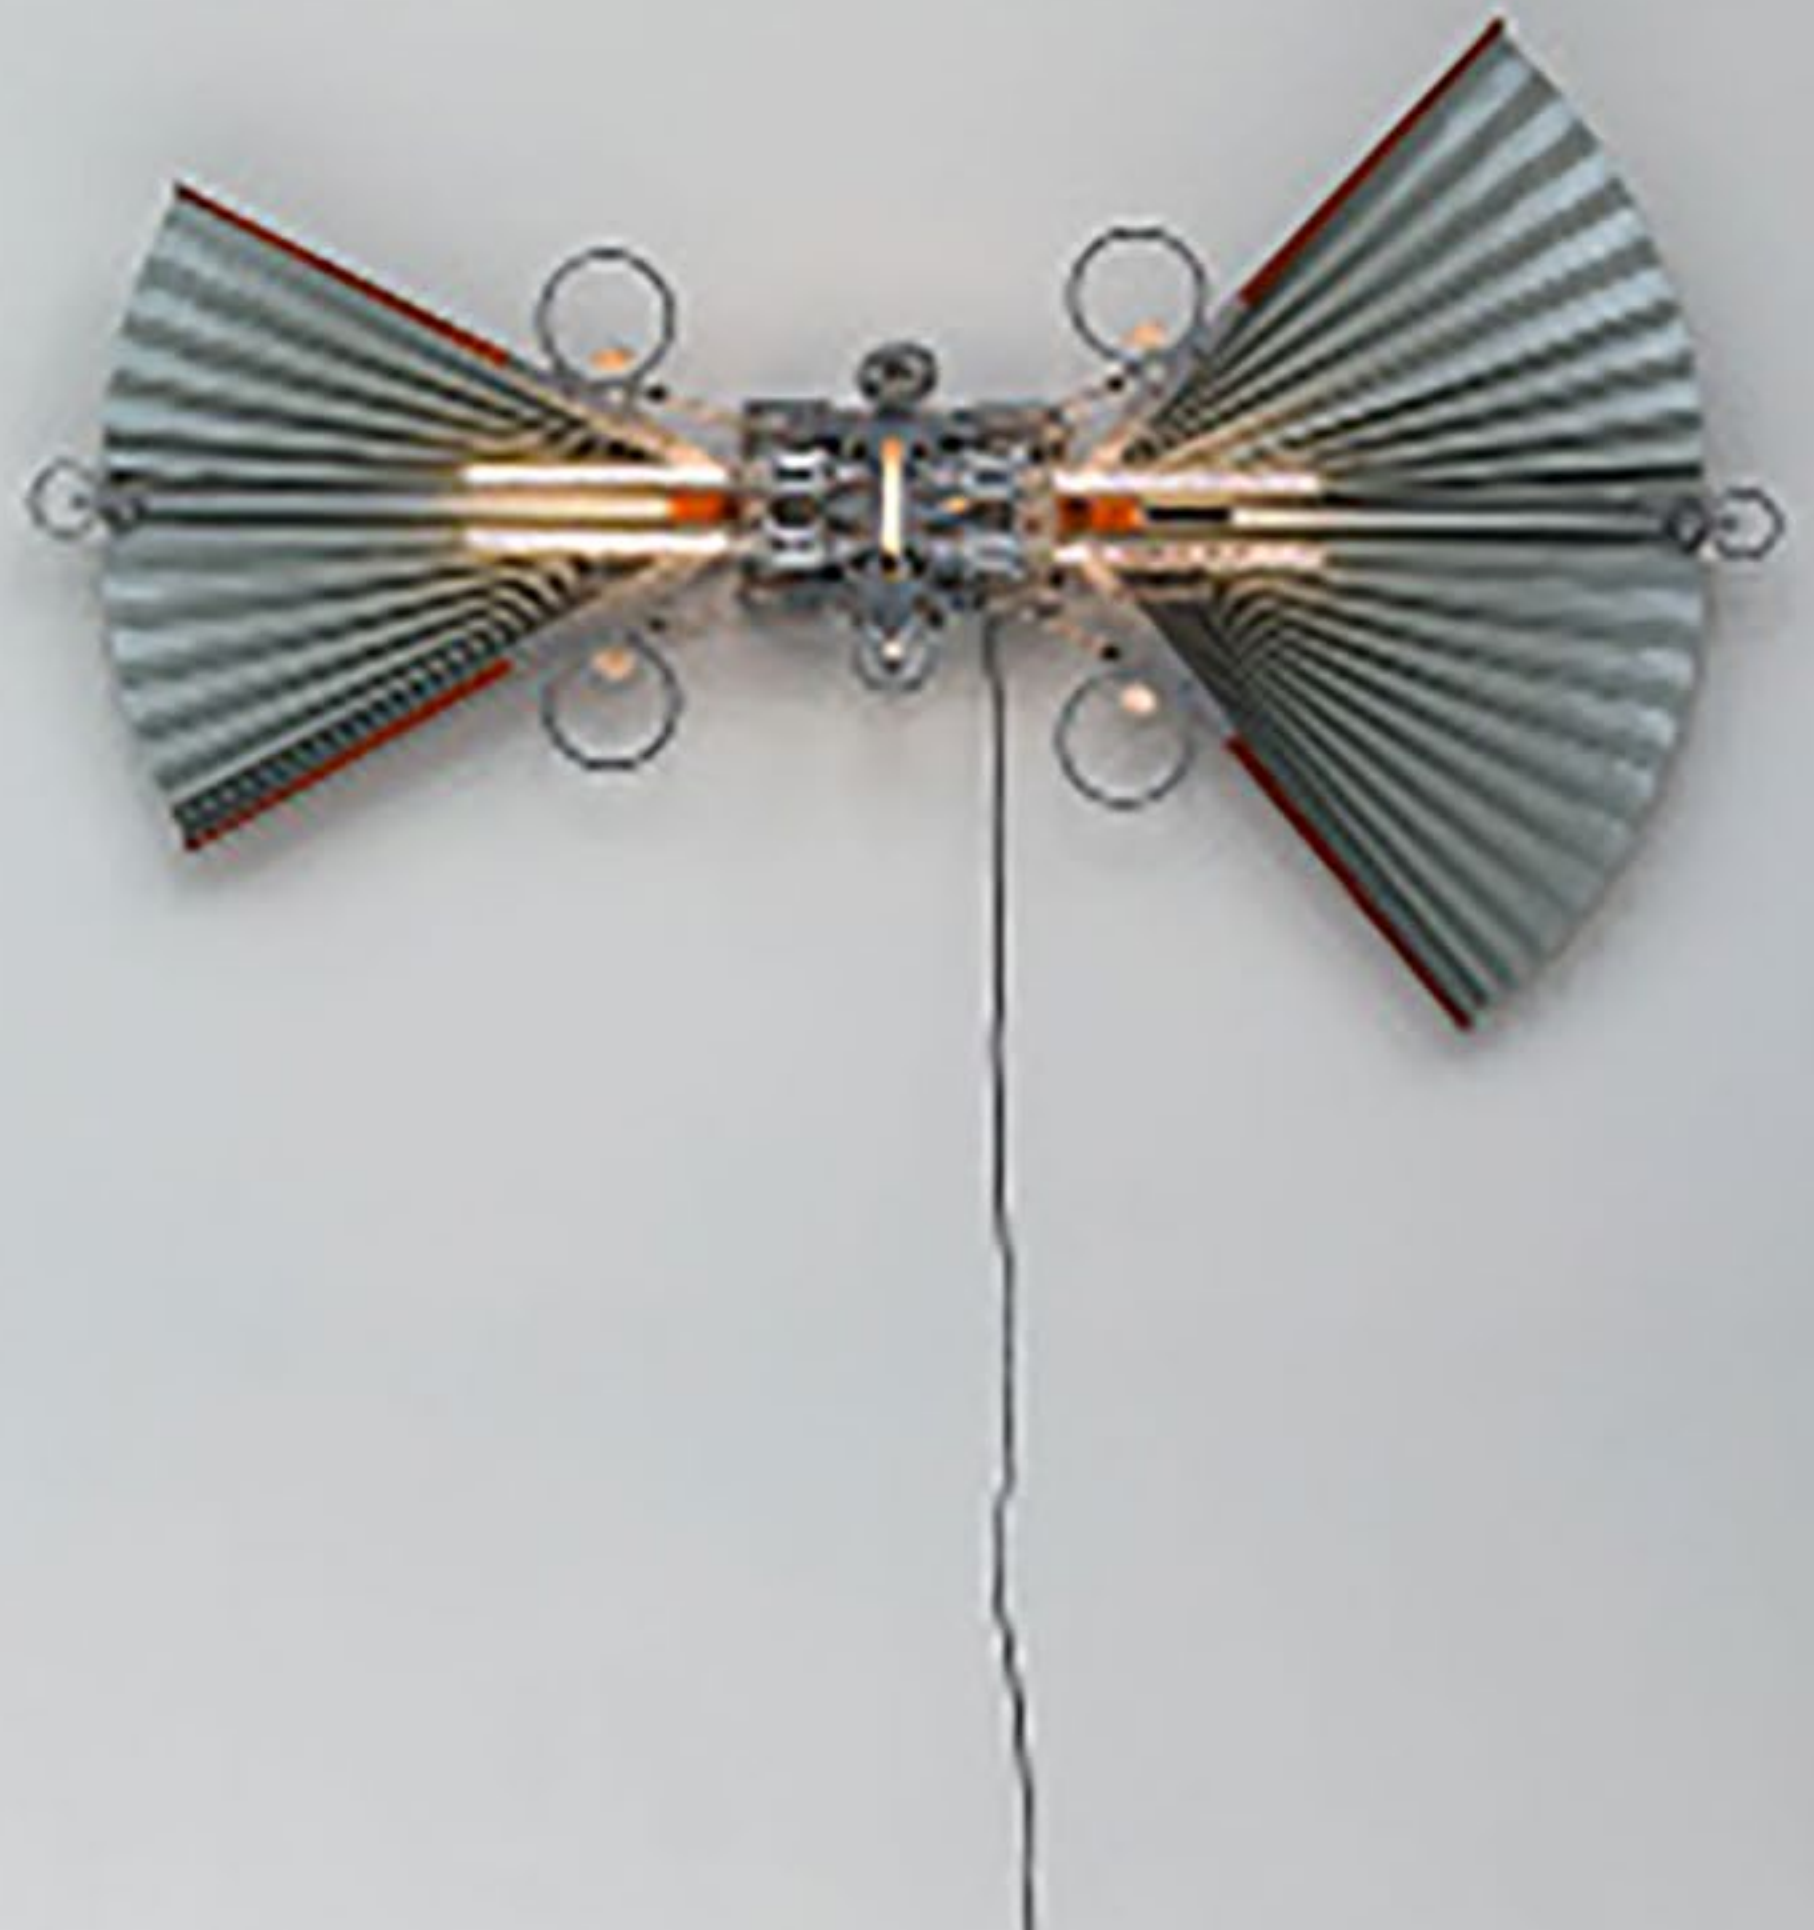

Skipper

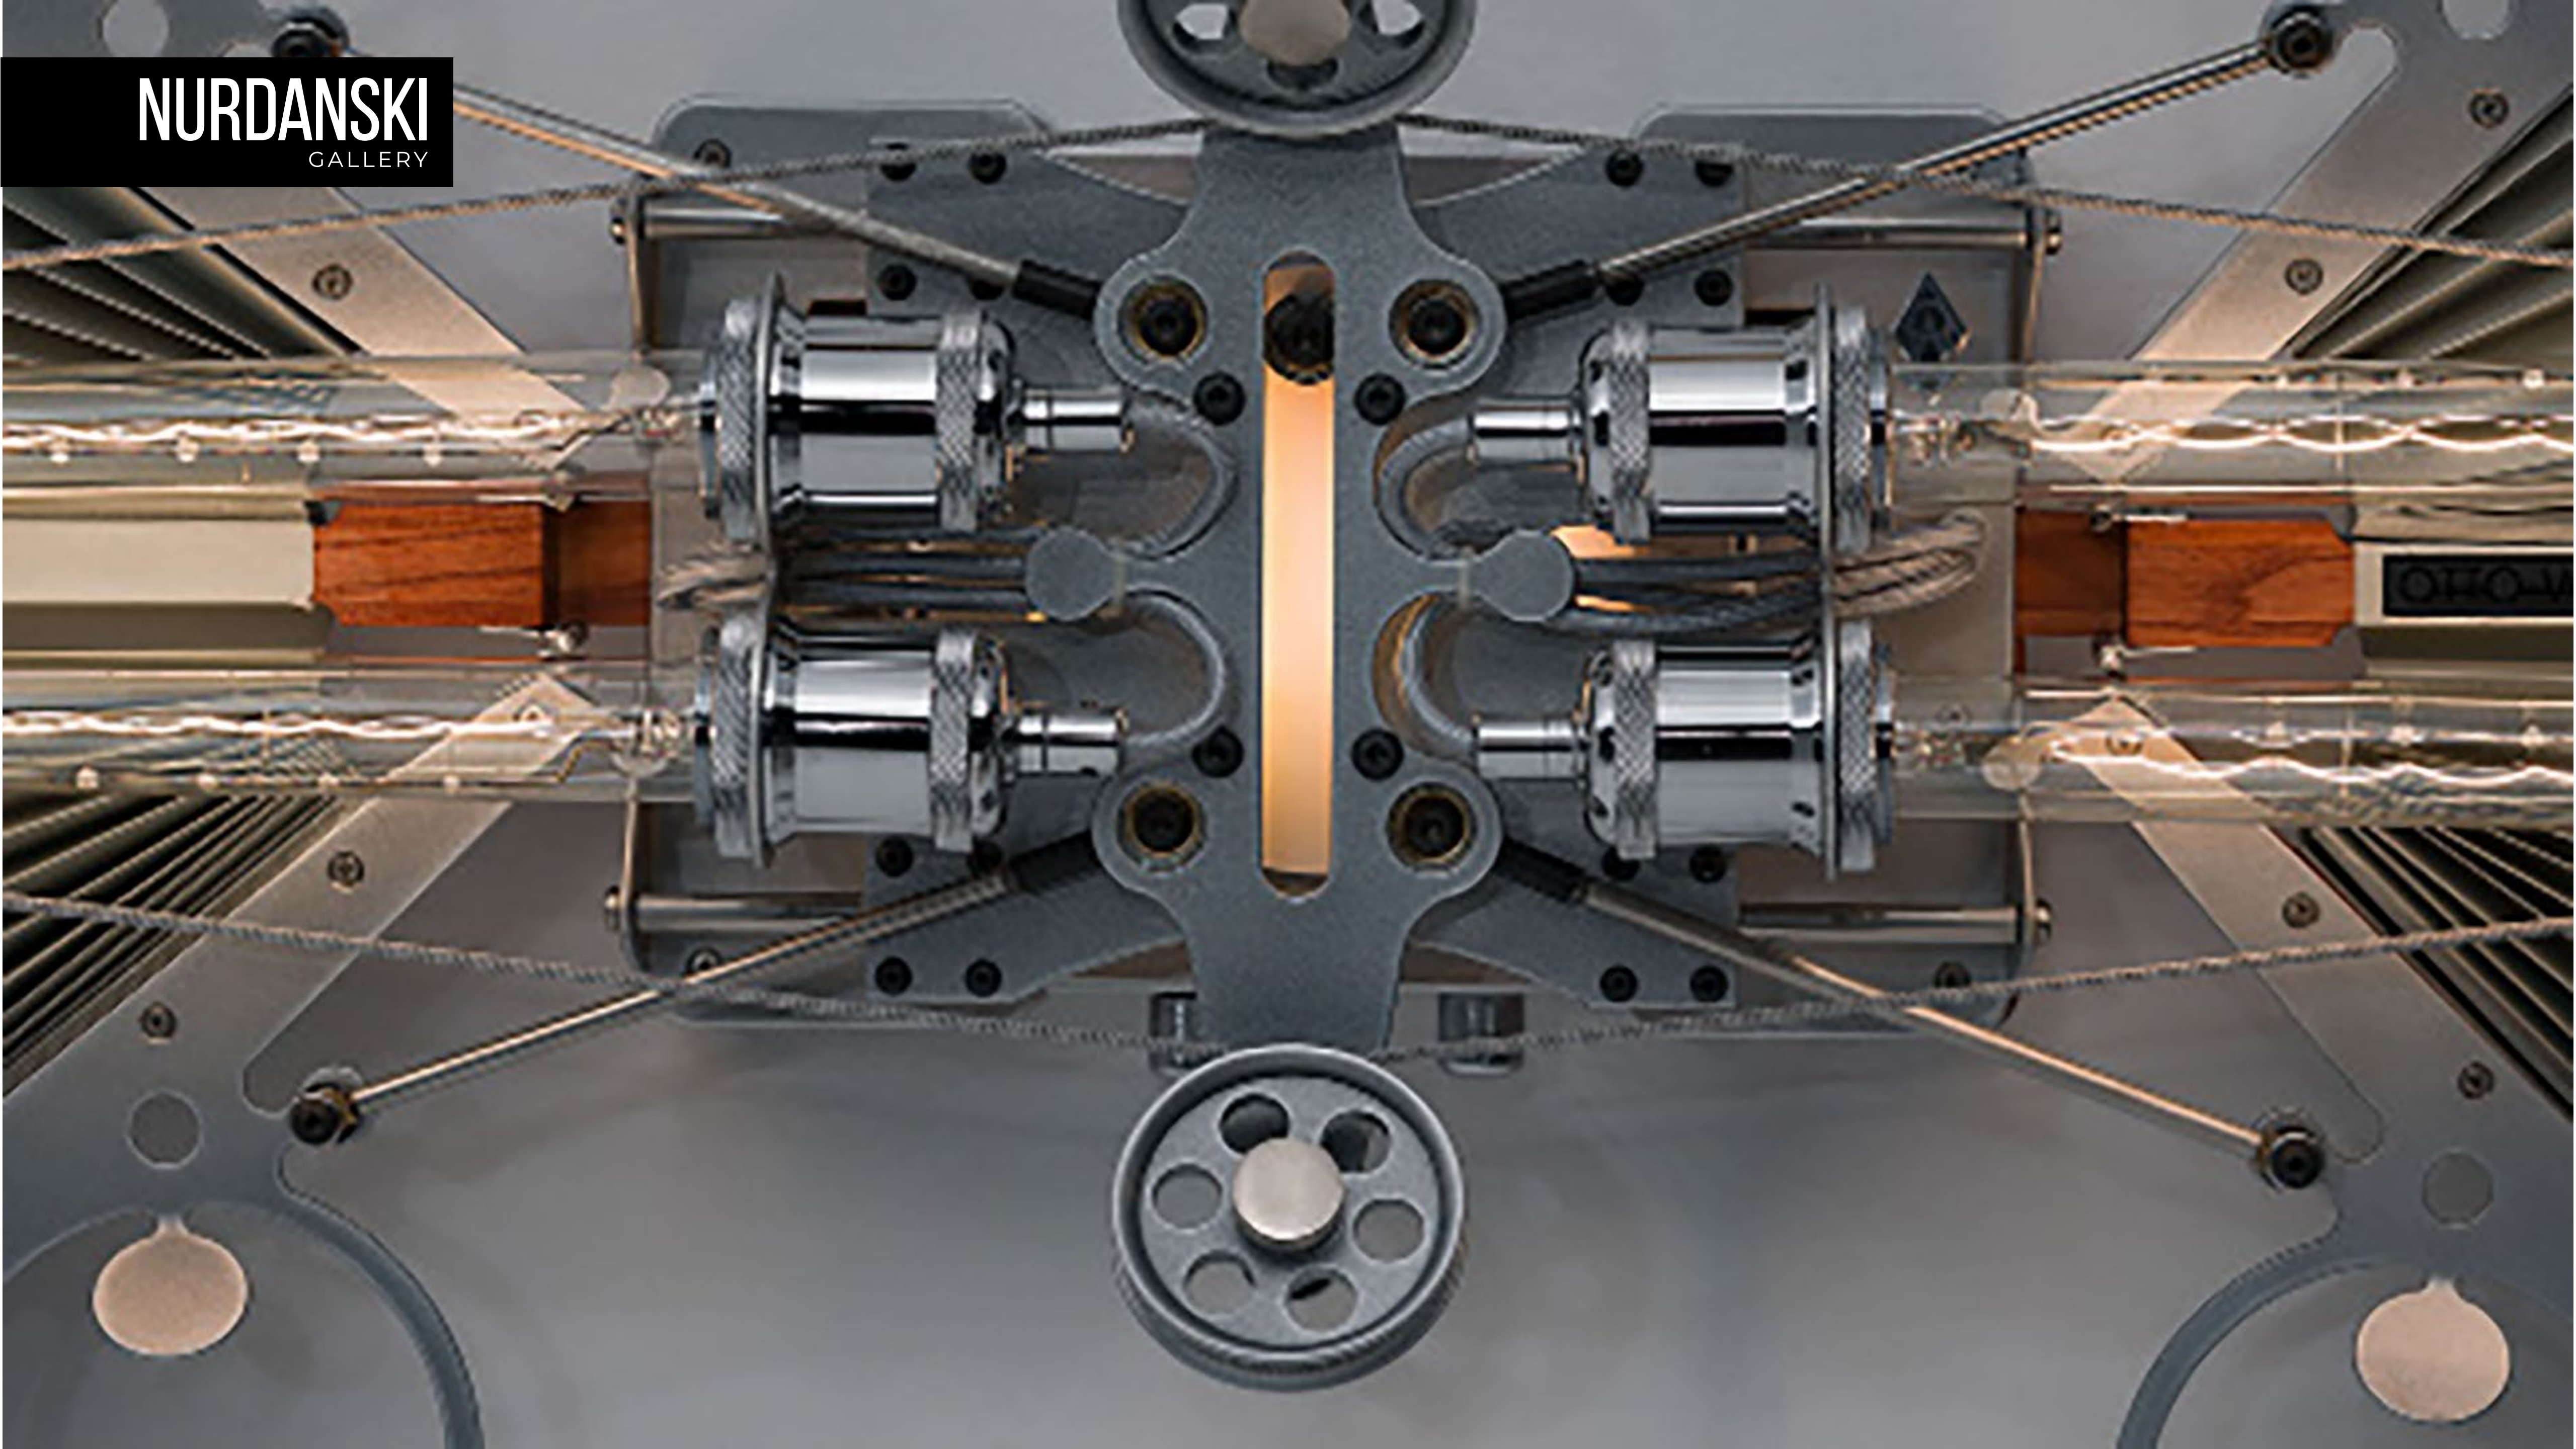

Due to the horizontally moving carriage with small lights attached to it, the object has an ability to shift the mass center in the horizontal direction, while simultaneously closing one part and opening another.

Function and form merge, all metal movable parts are visible, which, in combination with softness and refinement of paper pleats, creates both contrast and unity.

GALLERY

Thrinax

W: 1160mm H: 1860/2100mm D: 1160mm

materials: metal (color: black) North American walnut
3 ring lamp diameter 100mm 12 volt 3 watt
3 diodes with lenses 12 volt 9 watt

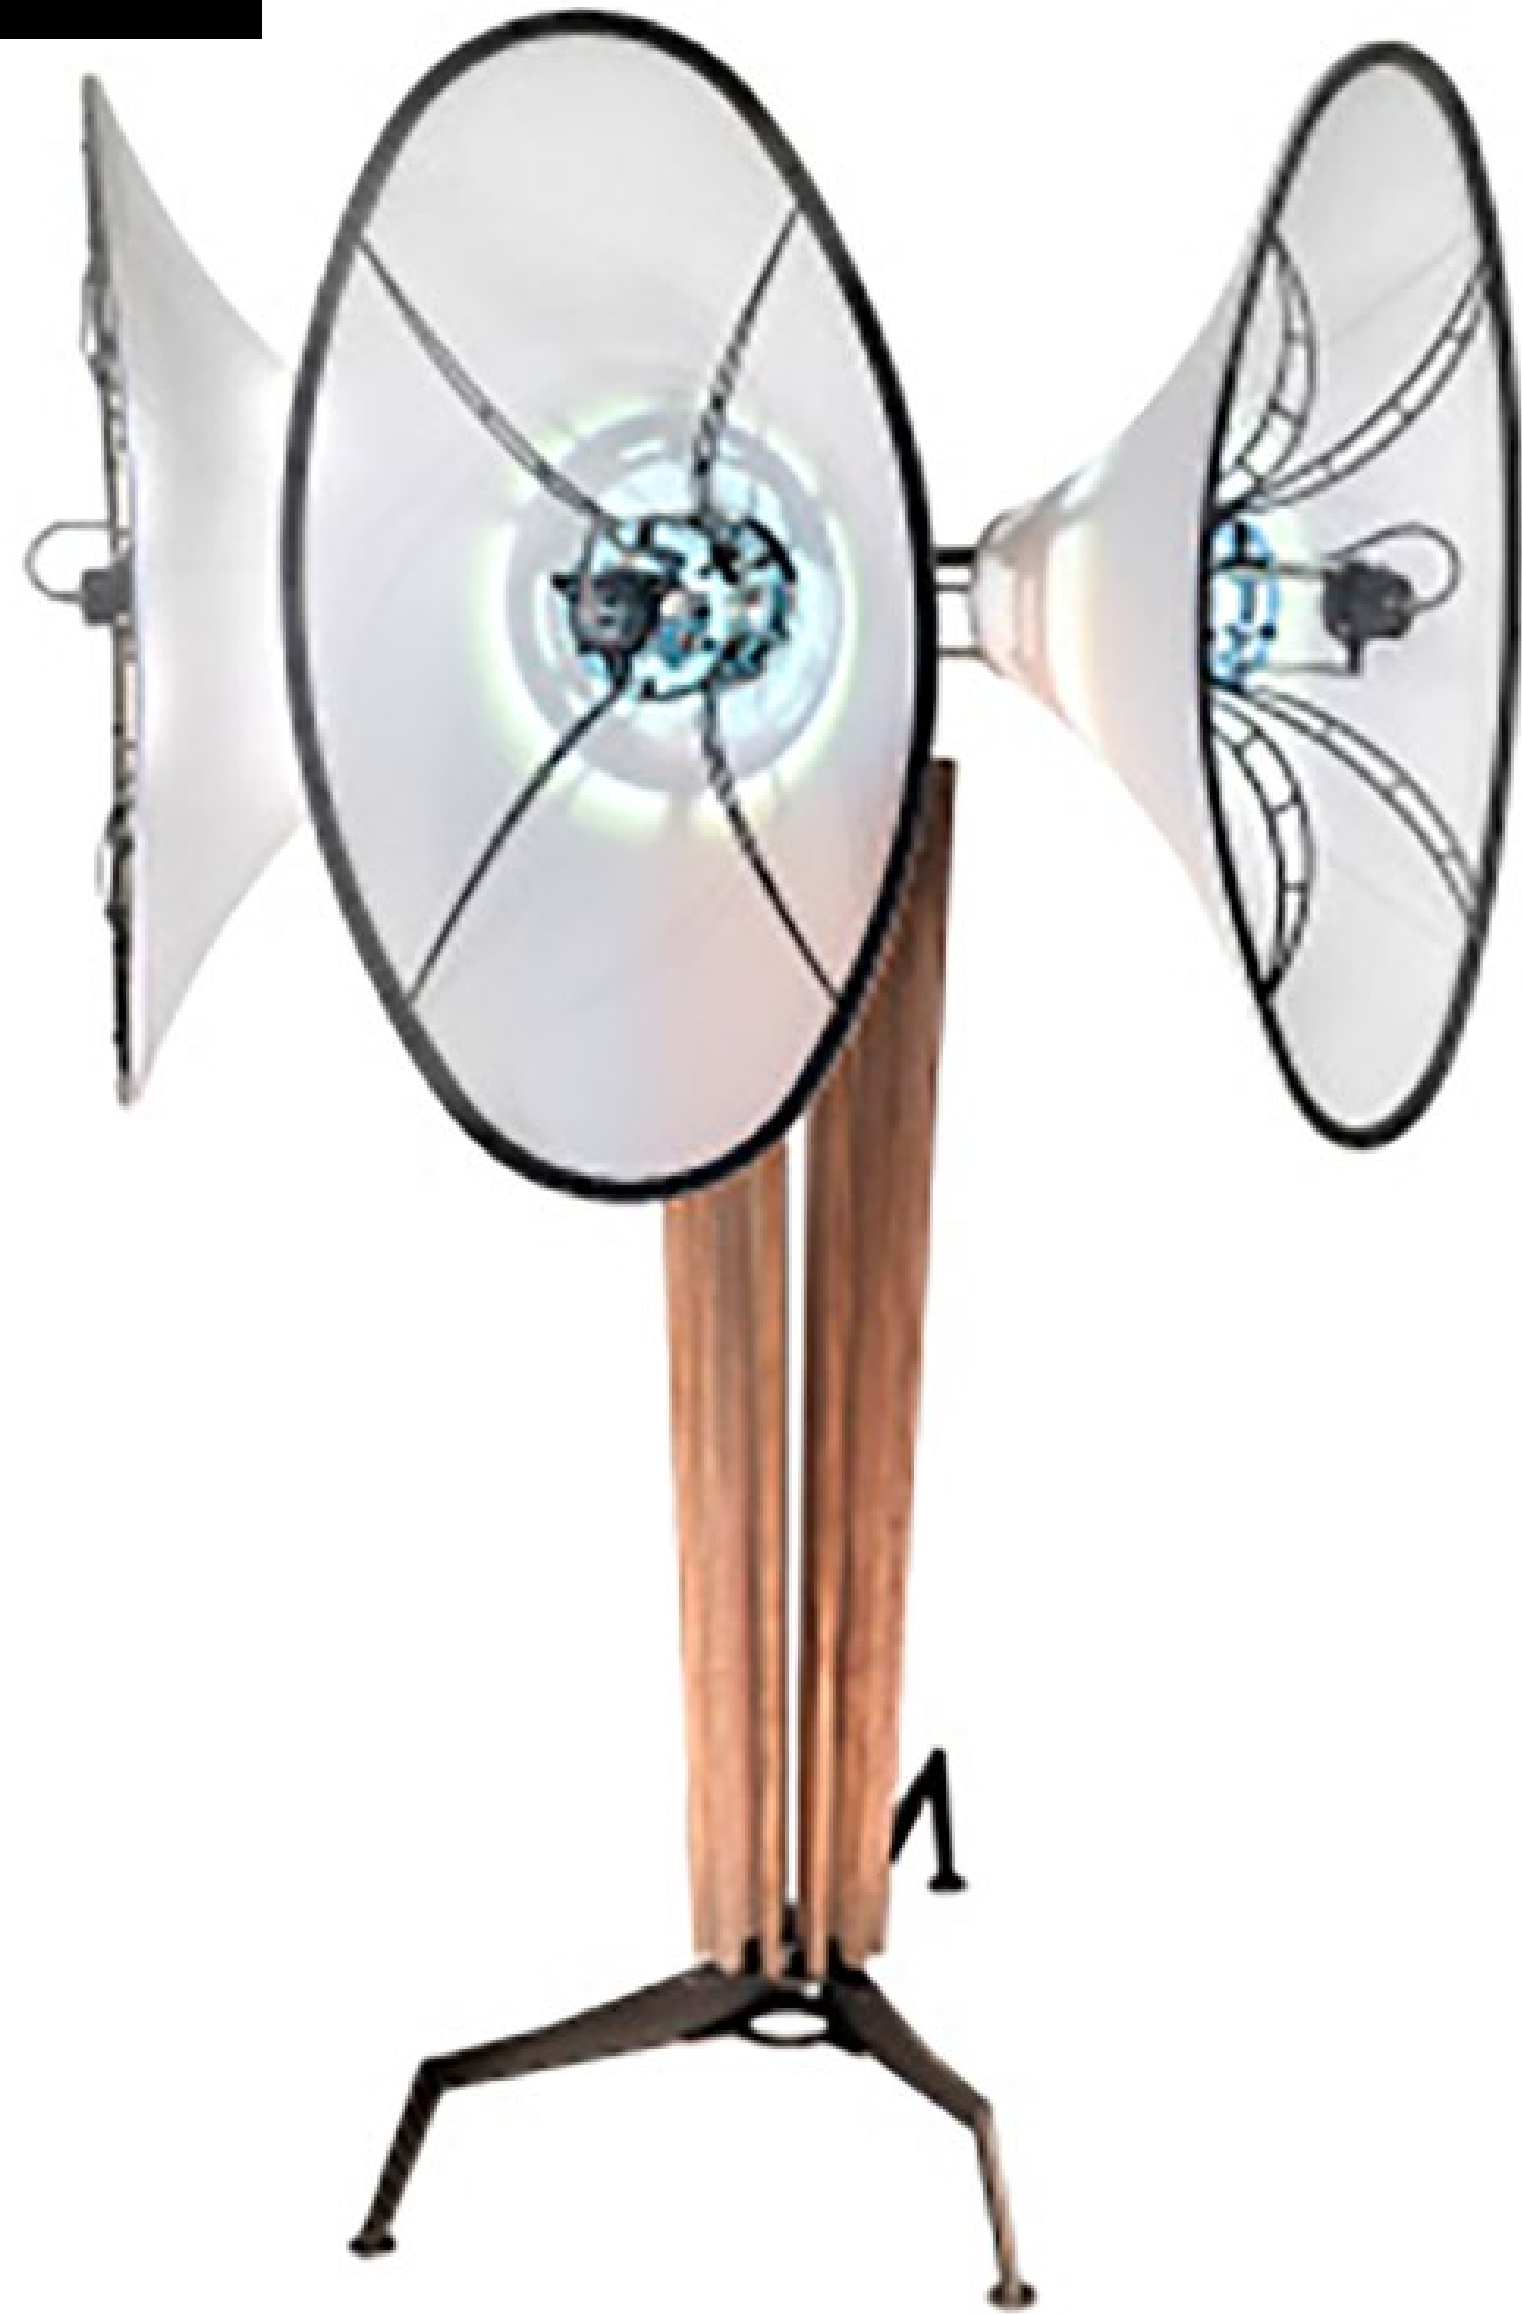

Edition: 1/10 each one is unique

Thrinax

Strict and sophisticated, taller than human, Thrinax visual prowess is due to its design features and original lighting.

Smoothly swaying towards each other, openwork metal fins and paper leaves with characteristic outlines harmoniously complement themselves. Articulated metal supports, central part in the form of a cocoon, crowned with ribbing, in combination with movable elements demonstrate the organic combination of large-scale elements and small details of the sculpture.

Apollo 18

W: 1120mm H: 1610mm D: 800mm

materials: metal (color: 7016) stainless steel ash
6 diode lamps 12 volt 9 watt

Edition: 1/10 each one is unique

Cypollo 18

Permeated with light, dynamically tilted back, the openwork base of the sculpture carries 3 movable elements, combining in their construction the rigidity of metal parts and the weightlessness of a fabric cover that forms the bionic appearance of an object.

Static light sources and a moving shell form a kind of dynamic between light and shadow.

Gemini

W: 850mm H: 1350mm D: 850mm

materials: metal (color: 7035) North American walnut
9 diode lamps 9 watt

Edition: 1/10 each one is unique

Gemini

The centrally symmetrical tripod is attractive for its well-developed decorative design. Bordering on redundancy, balancing on the edge, Gemini easily combines detailed design with a flawless mechanical component.

903

W: 340mm H: 1300mm D: 420mm

materials: metal (color: 7043) stainless steel (color: 7026)
rice paper ash tinted teak
2 ring lamps 100 mm

Edition: 1/10 each one is unique

903

W: 340mm H: 1100mm D: 420mm

materials: metal (color: 6020) stainless steel
rice paper ash tinted teak
2 ring lamps 100mm

Edition: 1/10 each one is unique

903

The lacquered ellipsoid, located under the reflected light of the ring lamps, carrying a mechanical gear inside itself, owing to an unusual engineering solution, makes oscillatory movements in space along a complex trajectory. The elaborate openwork construction of the frame, equipped with diagonal braces, enhances the spectator's emotion.

WARRANTY OBLIGATIONS

1 year guarantee for the work of sculptures from the artist's technical service elimination of breakdown within a month technical service is in touch every day through Telegram or another messenger.

Elimination of a malfunction in the work of the sculpture during 1 year + by agreement with the technical service of the artist.

Light sources warranty service:

Replacement of lights for Skipper, Hover and 903 is performed by the client independently.

These models are shipped with a spare lamp kit.

For other models of the collection, the light sources have warranty period of 9 months and can only be changed by artist's technical service.

TERMS OF USE

- mains voltage 220 V
- exclusively in door
- avoidance of direct air flow.
- temperature range 15 - 30 °C
- no direct sunlight to avoid burnout of the varnish
- paint coating of wooden parts of the structure
